

James Jamieson Construction has a wealth of experience in earthworks. From site clearance, excavation, sewer, drainage and road work to concrete foundations and flooring, our extensive fleet of plant machines can deliver a tailored solution. We are equipped and experienced to undertake projects of any size. From inception to completion, we have maintained a superb reputation based on client satisfaction.

When it comes to drainage, from installation and maintenance of culverts to septic tank installations, from the pumping of mains to storm water attenuation tanks, James Jamieson Construction can deliver a solution that is the right one for you.

Get in touch with us today and we will design the solution optimised to your requirements.

"James Jamieson Construction plant, equipment and machinery is of the highest standard and not a single hour was lost due to machine downtime. The staff of James Jamieson Construction, are all mature, experienced men with excellent safety record, best work ethic and a professional skills set. I would have absolutely no hesitation in recommending James Jamieson Construction for any building development and construction projects."

Alfie Cheyne - Chief Executive Officer, ACE Winches
